

PRESS RELEASE

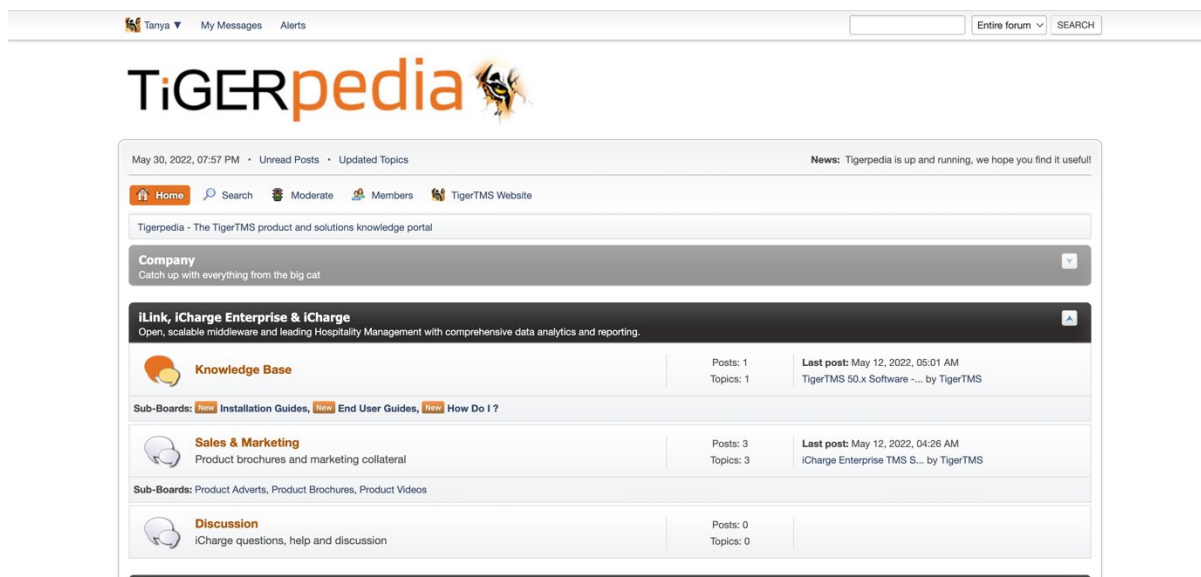

FOR RELEASE: 7th June 2022

Launching Tigerpedia – the TigerTMS Knowledge Base

Supporting the concept: Knowledge is Power

TigerTMS (<http://www.tigertms.com>) has launched Tigerpedia – the knowledge base and discussion platform that brings greater support for customers and partners.

Enhancing the customer experience enables hoteliers and partners to thrive in business. That is why TigerTMS has made available its knowledge portal. Tigerpedia is a platform that hosts a wealth of important collaterals ranging from sales and marketing information, through to technical documents such as Installation Guides, End User Guides, and How do I information.

Tigerpedia is also a discussion forum where customers, resellers, and both authorised and authorised services partners can share information, ideas, or ask and answer questions.

Due to the nature of this knowledge platform, access to Tigerpedia will be determined by user profiles. Any TigerTMS customer, reseller, authorised partner or authorised services partner can log in or apply for access by visiting <https://tigerpedia.tigertms.com/>.

John Owen, TigerTMS CEO comments: “We’ve introduced Tigerpedia as yet one more way to provide greater value to our end user hoteliers and our valuable partners. After all, we strongly believe, their success is our success. By enabling direct access to our wealth of product information users will be able to quickly look for information, or directly chat to others within our community. I am personally looking forward to seeing the Discussion Forum being used, sharing knowledge and information is of paramount importance.
