- Optimizes battery life
- Works over WiFi and GSM Networks
- Hotel specific branding
- Software as a Service

New Mobility for Guests

In the post-Covid world, there will be an increasing reliance on delivering services via the guests' own mobile device, rather than traditional shared devices within the property.

iConnect LITE allows hotels to easily integrate guest mobile handsets with their own telephone systems.

Competitive pricing makes **iConnect LITE** a viable solution for all types of hotels.

Easy Set Up leads to Happier Guests

Hotellers want solutions that deliver real value for their guests without the need for complex set-up processes.

TigerTMS recognizes this.

All of our solutions are designed for simplicity of installation and speed of delivery. The intuitive design is easily understood and the guest experience is immediately enhanced. Rapid assimilation leads to happier guests and increased hotel revenues.

Available on a monthly subscription basis, the number of connected users is controlled by the hotel for maximum return on investment.

TigerTMS Suite of Hospitality Applications

iConnect LITE is part of a comprehensive family of applications from TigerTMS that optimize hotel efficiencies and enhance guest service. We have also developed:

- ⇒ **iLink**: industry-leading middleware Service Bus with hundreds of interfaces to PMS and other solutions.
- ⇒ **iCharge**: call accounting platform with optional advanced reports used widely throughout the world
- ⇒ **InnLine**: multi-lingual voicemail and wake-up system
- ⇒ **iNotify**: brand new messaging solution that integrates hotel systems with apps (e.g. WhatsApp) already resident on guest devices
- ⇒ **iConnect**: full BYOD solution with custom screens and integration with other hotel systems
- ⇒ **iGuest**: delivers full customer information, outstanding tickets and alarm notification to front-line hotel staff
