

iPortal

Hospitality Specific Smartphone Solution

Key Features

- Easy access to hotel information & services
- No downloads
- Custom branding
- Revenue enhancing
- Messaging
- Telephony
- Mobile Check-Out

New Mobility for Guests

In the post-Covid world, there will be an increasing reliance on delivering services via the guests' own mobile device, rather than traditional shared devices within the property.

iPortal delivers hotel information, messaging, telephony client and auto check-out to the guest smartphone without the need to download an App.

Simply scan a QR code to access the iPortal that is the window for all of the applications a guest will ever need during their stay!

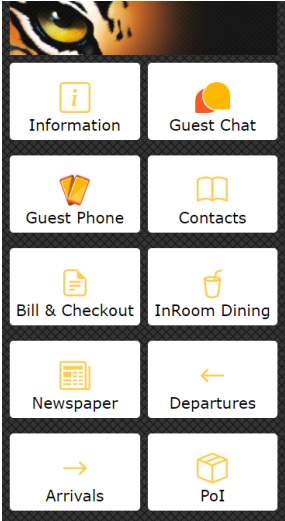

Easy Set Up leads to Happier Guests

Hotellers want solutions that deliver real value for their guests without the need for complex set-up processes.

TigerTMS recognizes this. Our mantra is "EASY TIGER".

All of our solutions are designed for simplicity of installation and speed of delivery. The intuitive design is easily understood and the guest experience is immediately enhanced. Rapid assimilation leads to happier guests and increased hotel revenues.

iPortal is accessed via QR code— for instant access to hotel services, information and communications applications

TigerTMS Suite of Hospitality Applications

iPortal is part of a comprehensive family of applications from TigerTMS that optimize hotel efficiencies and enhance guest service. Other products include:

- ⇒ **iLink**: industry-leading middleware Service Bus with hundreds of interfaces to PMS and other solutions.
- ⇒ **iCharge**: call accounting platform with optional advanced reports used widely throughout the world
- ⇒ **InnLine**: multi-lingual voicemail and wake-up system
- ⇒ **iNotify**: messaging solution that integrates hotel systems with apps (e.g. WhatsApp) already resident on guest devices
- ⇒ **iConnect LITE**: enables guest smartphone to become extension of Hotel telephone system
- ⇒ **iGuest**: delivers full customer information, outstanding tickets and alarm notification to front-line hotel staff
